

MISSION-FOCUSED. GLOBALLY CAPABLE.

A veteran-owned U.S. federal contractor delivering human capital, base support, engineering, technology and logistics solutions — CONUS and OCONUS.

CORPORATE & FEDERAL CAPABILITIES BROCHURE
Cygnus Technology Inc. — SBA-Certified Federal Contractor

WHO WE ARE

Cygnus Technology Inc. is a veteran-owned U.S. federal contractor delivering human capital, base support, engineering, technology, and procurement & logistics solutions for government and defense missions across the United States and internationally.

U.S. federal contracting accountability, paired with the field relationships and operational experience required to execute internationally.

U.S. GOVERNANCE

Incorporated in Delaware, headquartered at 125 Orchard Ave, Newington, Connecticut 06111, United States - CONUS and OCONUS delivery under one accountable structure.

VETERAN LEADERSHIP

Direct senior involvement in every engagement, from pursuit through closeout, reporting and support.

CAPABILITY FIRST

SBA certification opens doors. Disciplined execution and transparent reporting keep Cygnus in the conversation.

Official U.S. Small Business Administration certifications. Cygnus' SDVOSB and VOSB status is held by Cygnus Technology Inc. in the United States and is not extended to any affiliated non-U.S. entity.

REGISTERED FEDERAL CONTRACTOR

Identifiers on this page reflect Cygnus Technology Inc.'s current SAM.gov registration and SBA.gov certification records.

FIVE DISCIPLINES. ONE DELIVERY MODEL.

Cygnus organizes its federal delivery around five integrated capability areas. Each stands alone as a discrete scope, or combines to support a full base, program or facility requirement.

01

HUMAN CAPITAL SOLUTIONS

Recruiting, workforce deployment, transition support and qualified personnel for federal mission requirements.

02

BASE & MISSION SUPPORT

Facilities, life support, operations, maintenance and program delivery for government and defense sites.

03

ENGINEERING & PROJECT DELIVERY

Planning, engineering, construction, field execution and sustainment for facility and infrastructure work.

04

TECHNOLOGY SERVICES

Secure IT infrastructure, systems integration and managed technology for mission environments.

05

PROCUREMENT & LOGISTICS

Strategic sourcing, supplier management and CONUS/OCONUS material movement.

ONE FRAMEWORK, FIVE WAYS TO ENGAGE

Whichever capability leads a requirement, delivery runs through the same senior oversight, subcontractor discipline and reporting standard described on page 13.

HUMAN CAPITAL SOLUTIONS

A federal requirement is only as strong as the people mobilized against it. Cygnus recruits, qualifies and deploys personnel — from individual specialists to full project teams — with the documentation and oversight federal customers expect.

SUPPORTED AREAS

- Recruiting and candidate qualification
- Workforce deployment and mobilization
- Surge and project-based manpower
- Transition support
- International deployment coordination

SOURCED

Candidate qualification & vetting before mobilization

DEPLOYED

CONUS & OCONUS mobilization with full documentation

SUSTAINED

Ongoing oversight, transition & surge support

EXECUTION ADVANTAGE

Right-sized teams, sourced and mobilized fast, under U.S. federal contracting standards — not a one-size roster.

CAPABILITY 02

BASE & MISSION SUPPORT

Cygnus supports the operations that keep a base or mission site running — day-to-day facility upkeep, coordinated program delivery, and the subcontractor oversight that holds a multi-trade site together.

FACILITIES OPS Support and operations across a site's daily requirements.	MAINTENANCE Custodial, field services and utilities coordination.	LIFE SUPPORT Requirements supported where scope calls for them.	PROGRAM DELIVERY Coordinated execution across the full site scope.	MISSION VALUE One oversight layer across every trade and vendor on site.
---	---	---	--	--

ENGINEERING & PROJECT DELIVERY

Cygnus plans and delivers facility, civil and infrastructure work — scoping through construction, refurbishment and closeout — with the subcontractor management and quality oversight federal work requires.

DELIVERY DISCIPLINE

Every engineering scope moves through the same controls: qualified subcontractors, documented inspections, and a closeout package built for federal review.

PROJECT LIFECYCLE

01

SCOPE

Requirement definition, drawings, specifications.

02

PLAN

Sequencing, resourcing and schedule baseline.

03

QUALIFY

Subcontractor vetting, licensing, insurance verification.

04

MOBILIZE

Crews, materials and site access coordinated for start.

05

EXECUTE

Construction, MEP and civil works under active oversight.

06

INSPECT

Site inspection, documentation, corrective action.

07

CLOSEOUT

As-builts, compliance documentation, handover.

“One accountable delivery process, from scope definition to federal closeout — regardless of trade or site.”

CYGNUS ENGINEERING & PROJECT DELIVERY STANDARD

Qualified Subcontractors

Licensing, bonding and insurance verified before award.

Documented Inspections

Site inspection records maintained at every milestone.

As-Built Packages

Closeout documentation built for federal review.

Compliance Reporting

Status, safety and quality reporting throughout execution.

CAPABILITY 04

08

TECHNOLOGY SERVICES

Cygnus delivers secure, deployable technology for federal and mission environments — infrastructure built to work reliably in the field, not just in a data center.

SECURE IT INFRASTRUCTURE

Hardened networks built for mission use.

SYSTEMS INTEGRATION

Platforms and tools that work together.

MANAGED TECHNOLOGY

Ongoing operation and support, not just install.

NETWORK DEPLOYMENT

Field-ready connectivity, stood up fast.

MISSION SUPPORT

Technical support scoped to the requirement at hand.

CAPABILITY 05

09

PROCUREMENT & LOGISTICS

Cygnus sources, qualifies and moves what a federal requirement needs - coordinating vendors, freight and delivery across CONUS and OCONUS locations.

SOURCE	QUALIFY	PROCURE	MOVE	CLEAR	DELIVER
--------	---------	---------	------	-------	---------

Vendor management, OEM sourcing, international freight, warehousing and last-mile coordination sit behind every stage of that flow.

Vendor & OEM Sourcing

Qualified supplier and manufacturer relationships across CONUS and OCONUS markets.

Freight & Customs

International freight coordination and customs clearance for cross-border delivery.

Warehousing & Last-Mile

Storage, handling and final-mile coordination through delivery and acceptance.

GOVERNANCE & QUALITY

CONTRACTING DISCIPLINE

COMPLIANCE BUILT INTO EXECUTION.

FAR-ALIGNED PROCESS

Procurement, documentation and reporting structured to Federal Acquisition Regulation expectations.

SUBCONTRACTOR CONTROLS

Vendor qualification, insurance verification and performance oversight on every relationship.

QUALITY & REPORTING

Documented inspections and transparent status reporting throughout delivery.

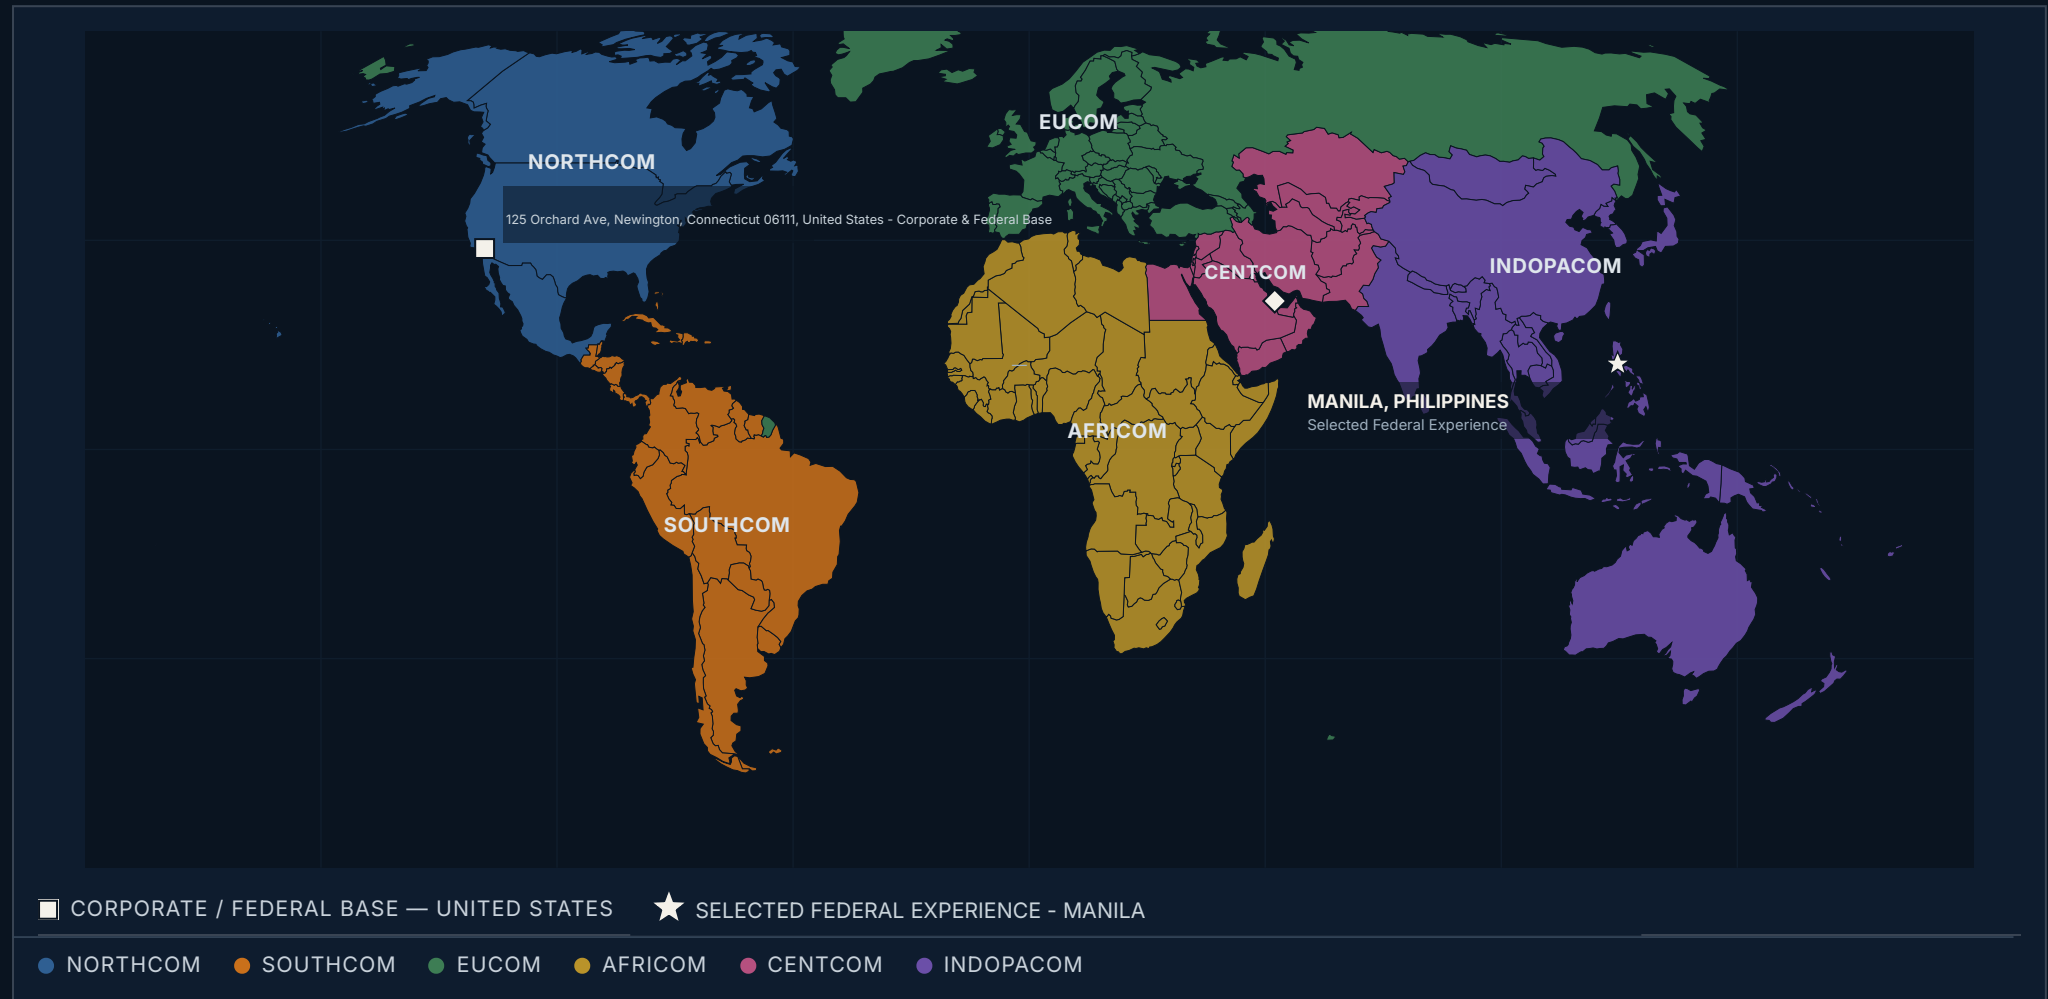

ETHICAL SOURCING

Supplier selection consistent with federal expectations, including NDAA Section 889 where applicable.

10

CONUS + OCONUS CAPABILITY

Combatant command areas are shown for federal opportunity, partner-network and mission-planning context - they do not represent Cygnus office or contract locations.

SELECTED FEDERAL EXPERIENCE

U.S. DEPARTMENT OF STATE — OVERSEAS PRIME DELIVERY,
MANILA, PHILIPPINES

12

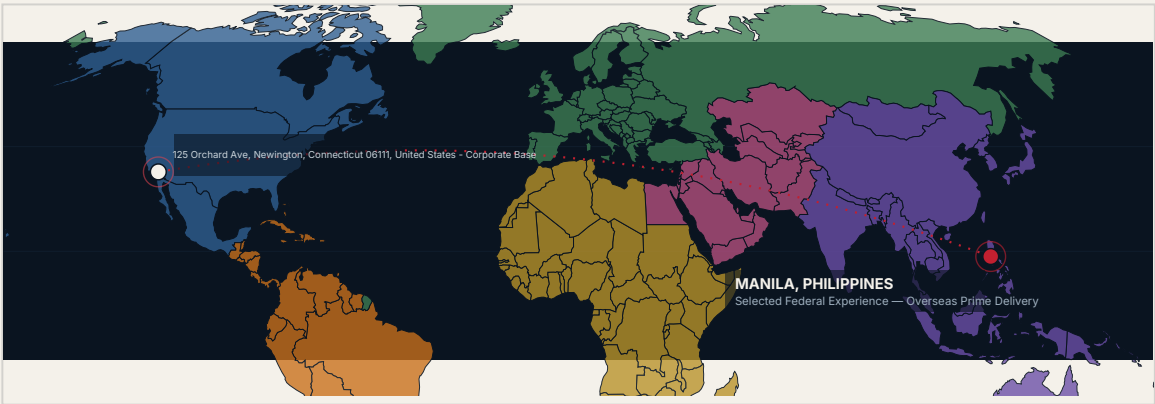

CUSTOMER	LOCATION	ROLE	SCOPE
U.S. DEPARTMENT OF STATE	MANILA, PHILIPPINES	PRIME CONTRACTOR	GOVERNMENT FACILITY REFURBISHMENT

Cygnus held the prime-delivery role on a U.S. Department of State facility refurbishment in Manila and remained the accountable contractual interface for the engagement — not a pass-through intermediary, but the party responsible for the work as a whole.

DELIVERY GOVERNANCE Coordinated customer requirements, subcontractors, consultants and site execution under a single point of accountability.	PROCUREMENT & SOURCING Materials, services and required resources were sourced and coordinated to support project execution.	CONTRACTOR MANAGEMENT Subcontractors were coordinated and managed while Cygnus retained the oversight expected of the prime.
PROJECT COORDINATION Schedule, dependencies and field progress were actively managed throughout delivery.	QUALITY & COMPLIANCE Quality oversight, compliance documentation and progress reporting supported the required closeout controls.	CUSTOMER ACCOUNTABILITY Cygnus remained the accountable delivery organization to the U.S. Department of State throughout the engagement.

Photograph shows U.S. and Philippine flags in a general military ceremonial setting; it is not photography from the Cygnus Manila engagement and no pictured individuals were part of that project. Map route line illustrates the CONUS-to-OCNUS delivery relationship, not a literal transit path.

THE DELIVERY FRAMEWORK

01

REQUIREMENT

Scope and objectives captured and validated before any resourcing decision.

02

PLAN

Delivery approach built around the specific requirement, not a template.

03

SOURCE & MOBILIZE

Personnel, suppliers and subcontractors qualified and mobilized, CONUS or OCONUS.

04

EXECUTE

Work proceeds under senior oversight with defined checkpoints.

05

CONTROL & REPORT

Schedule, risk and quality tracked continuously, reported transparently.

06

CLOSEOUT & SUPPORT

Documentation and handover completed, with continued availability.

ACCOUNTABILITY

THE SAME FRAMEWORK, EVERY ENGAGEMENT MODEL

AS PRIME CONTRACTOR

Cygnus owns the delivery framework end to end — the single accountable interface to the customer across every subcontractor and supplier on the effort.

AS SUBCONTRACTOR

The same discipline runs inside the prime's structure — documentation, reporting and schedule control that make Cygnus easy to oversee.

AS TEAMING PARTNER

Shared planning and coordination touchpoints at every stage, so joint proposals and joint delivery move on one schedule.

PARTNER WITH CYGNUS

Cygnus works alongside prime contractors, subcontractors, OEMs, manufacturers, distributors, engineering and construction firms, technology companies, staffing organizations and international suppliers to deliver federal and OCONUS requirements.

Prime Contractors

A veteran-owned SBA-certified teammate that strengthens small-business participation and adds CONUS/OCONUS delivery capacity.

Federal Subcontractors

A disciplined prime for defined scopes, with the documentation and reporting subcontractors need from a lead contractor.

OEMs & Manufacturers

A qualified U.S. federal route to market, backed by SAM registration and active engagement models.

International Suppliers

Access to U.S. federal and international opportunities.

WHAT PARTNERS GET

- A veteran-owned SBA-certified small business that counts toward federal small-business participation goals
- Active SAM registration, UEI and CAGE code ready for immediate teaming or subcontract award
- A single accountable point of contact for scheduling, documentation and quality across the engagement
- CONUS delivery experience paired with international capability for OCONUS requirements

“Cygnus is built to plug into a prime's structure or lead its own — with the same documentation discipline either way.”

WHAT SETS CYGNUS APART

01**VETERAN-LED ACCOUNTABILITY**

Direct veteran ownership and senior involvement in every engagement, from pursuit through closeout.

02**FEDERAL CONTRACTING DISCIPLINE**

SBA-certified status backed by SAM registration and a compliance-first approach to procurement and reporting.

03**CONUS + OCONUS PERSPECTIVE**

U.S. governance paired with real overseas execution experience.

04**INTERNATIONAL DELIVERY**

CONUS and OCONUS support aligned to federal requirements and accountable delivery.

05**MULTI-DISCIPLINARY CAPABILITY**

Human capital, base support, engineering, technology and logistics under one delivery framework.

06**FLEXIBLE TEAMING**

Structured to work as prime, subcontractor, supplier or teaming partner — whichever model fits.

One accountable contractor, backed by verifiable federal credentials — not a claim, a matter of record.
